

## ERASMUS+ KA3 Together for the Future VET skills

### TAVOITTEET:

We are facing same challenges e.g. demographic changes and the poor image of VET in many European countries. European mobility is a great way to acquire the skills needed in the future work, but only 10 % learners use this great opportunity.

The network of experienced Finnish, Italian and Spanish partners aim to take a step ahead on European level. The aim is to make skills and competences more visible and comparable in labour market on European level. We will actively promote VET and share success stories, best practices, new innovations and EU tools primarily by developing tools and good practises and disseminating them for the European Skills Week. We focus on internationalisations strategies and key competences.

Internal target groups are VET providers' management, staff and learners. External target groups are other VET providers and their networks, on local, regional, national and European level as well as government and other regulatory bodies.

As a result of this project the participating organisations develop their international network and gain cooperation partners for future student/staff mobilities and for development projects. They strengthen the role of the internationalisation strategy and link it more closely with the overall strategy. They learn to recognise skills and competences that staff has acquired during mobility and learn to benefit from it in their own organisation. Working on strategy level enhances collaboration and mutual understanding between the partners. They develop a deeper understanding of their own and the partner countries' national frameworks.

In order to stay competitive in the global economy EU and their partner countries need a highly skilled workforce with well-developed Key competences that quickly adapts to new working tasks and professions by upskilling or reskilling. This is facilitated by developing methods for innovative fostering of Key competences in this project.

### TOIMINTA:

1. Contribute to the European Vocational Skills Week
2. Support the development of an internationalisation strategy at providers' level
3. Foster innovative learning of key competences in VET

**KOKONAISBUDJETTI:**

480 000€, SAMledu 25 000€
